PRINOTH CONNECT

Be sustainable and save money: Prinoth Connect provides you with up-to-date information about your equipment, exactly when and where you need it. The advantages of our tools are simpler operational planning and more cost-efficient and sustainable operation of your vehicles. Prinoth Connect is intuitive to use on PCs, tablets, and smartphones (Android/iOS) – with automatic cloud backup and synchronization.

MAINTENANCE OVERVIEW

All repairs and maintenance under control

Maintenance Overview ensures that vehicle maintenance is never overdue. The system also facilitates repairs and helps with spare parts planning – so you never run out.

RECORD DAMAGE IMMEDIATELY

Use remote diagnosis: upload a photo via smartphone – problem documented and visible to technicians. No effort, no misunderstandings.

NEVER MISS MAINTENANCE AGAIN

All service intervals at a glance – automatically linked to the actual operating hours of each vehicle.

PLAN AHEAD INSTEAD OF IMPROVISING

Early spare parts ordering possible – vehicles remain operational, downtime is avoided.

FLEET MANAGEMENT

All vehicles at a glance

The fleet management system enables efficient management of your vehicles through centralized recording, monitoring and evaluation of key machine data such as running times and fuel consumption. It provides a complete overview of the condition, location and activities of all vehicles with both live and historical data. Digital documentation of all driving and work processes enables sustainable improvements to processes and reduces operating costs.

COMPLETE CONTROL IN REAL TIME

Keep track of all vehicles at all times – this saves time, prevents downtime, and increases efficiency.

BETTER PLANNING, LOWER COSTS

Plan assignments more precisely and reduce idle times and fuel consumption – this significantly lowers operating costs.

SAFETY & TRACEABILITY

All driving and working data is automatically recorded – ideal for documentation and protection in the event of damage or disputes.

TRANSPARENT EVALUATIONS FOR BETTER DECISIONS

Clear statistics show where time and resources are being wasted – allowing you to optimize your operations in the long term. (PDF file export possible)

TASK MANAGER

Stay on top of every task, anytime

The Task Manager is a digital tool for efficiently setting up, distributing, and tracking tasks in your day-to-day work. Who did what and when, and is there anything else to do? The Task Manager makes it easier to manage your tasks, keeps you up to date at all times, and gives you the confidence that your business is running smoothly.

BE EVERYTHING AT A GLANCE – NOTHING GETS LOST

Keep track of all tasks: creating skid trails, preparing planting areas, machine repairs, or working hours – clearly structured.

PLAN TASKS DIRECTLY ON THE MAP

Assign tasks to specific locations – see exactly what needs to be done and where. Ideal for large, complex forestry areas.

FAST COMMUNICATION WITHIN THE TEAM

Push messages let you know right away about new, overdue, or completed tasks – everyone stays up to date.

CLEAR ANALYSIS, BETTER PLANNING

Reports show how long tasks take, who did them, and where bottlenecks occur – for targeted optimization.
