

# BEAVER S700s - POWERFUL STUMP GRINDER FOR SKID STEERS.

The Beaver S700s is the perfect solution for efficient and precise stump and root removal. Designed for skid steers up to 120 HP, it delivers maximum performance and outstanding grinding results.

With its powerful grinding wheel and aggressive cutting tools, the S700s effortlessly grinds stumps down to depth, leaving a clean and well-prepared surface – ideal for construction, landscaping, and forestry projects.

## COMPACT & VERSATILE

The compact design allows easy removal of stumps and roots in any environment, ensuring the best results with minimal effort.

## OPTIMIZED HYDRAULIC POWER

Three powerful hydraulic motor options (40, 45, 73 cc) cover the full volume flow range – no drain line required.

## LIGHTWEIGHT & UNIVERSAL FIT

Low weight and a skid steer quick attach plate make it compatible with a wide range of carriers – ideal for rental fleets.

# MAXIMUM EFFICIENCY FOR STUMP REMOVAL

## POWERFUL & EFFICIENT GRINDING

The milling wheel features 10 tool holders, each equipped with 4 cutting teeth (BFZ 60), plus 5 additional teeth on the edge for superior cutting performance. The partially open housing allows the wheel to penetrate the ground effortlessly.

## MINIMAL MAINTENANCE

The direct drive system reduces wear parts, ensuring lower maintenance costs and longer service life.

## FLEXIBLE CONTROL OPTIONS

The tilt and swivel functions can be controlled via the carrier's hydraulic connections or an optional electric joystick for even greater ease of operation.

## TECHNICAL DATA BEAVER S700s

Grinding wheel diameter	27.6 in (700 mm)
Grinding wheel width	4.5 in (114 mm)
Power range	up to 120 HP
Volume flow	16 – 37 gpm (60 – 140 l/min)
Weight*	1,190 lbs (540 kg)
Tools	45

\* Weight depending on the configuration of the machine
